

WOMEN CANDIDATES SELECTED
FOR SCHOOL BOARD

At a meeting of the League of Women Voters at the city hall Saturday afternoon, Mrs. L. H. Gabriel and Mrs. E. P. Bridwell were placed in nomination as candidates for the board of education at the school election to be held April 5.

These candidates meet with the popular approval of both men and women voters and it is doubtful if there will be any other announcements for this office this spring. It is the general opinion that this is the year for women candidates to be elected. It is expected that a full vote of women voters will be polled at this election.

PALLET-BROWNING

TREATMENT FOR BAG WORM

J. H. H. Mote, Jasper county agent, says the following in regard to treatment for the bag worm pest:

"Spraying or dusting with an arsenical, supplemented by hand picking of the winter cocoons, will keep the pest under control. Orchards which are given the regular summer sprays will not be injured by this pest. Two pounds of arsenate of lead paste, or one pound of powdered arsenate of lead, to fifty gallons of water will quickly destroy the young caterpillars. Shade trees, shrubs and other trees and plants may be protected if one application of a poison spray is made soon after the over-wintering eggs hatch. In the orchard the spray applied after the blossoms fall, or the one applied ten days to two weeks later, will control the pest."

Mrs. Rose Miller, of the Fifth Street Quality Millinery Shop, spent Monday in Springfield, on business.
